EV User Guide & FAQ

Document RW-POL-05 · Version 1.4 · For EV scooters and EV bikes

This guide explains how to ride, charge and return a RideWise electric vehicle. Charges referred to here are set in the Late Return & Damage Penalty Schedule.

1. Our electric fleet

Model	Type	Battery	Typical range*	Full charge (home socket)
Ather 450X	EV scooter	3.7 kWh	105 km	5 h 40 min
Ola S1 Pro	EV scooter	4.0 kWh	115 km	6 h 30 min
TVS iQube	EV scooter	3.4 kWh	95 km	4 h 30 min
Bajaj Chetak	EV scooter	3.2 kWh	100 km	4 h 50 min
Revolt RV400	EV bike	3.24 kWh	100 km	4 h 30 min
Oben Rorr	EV bike	4.4 kWh	130 km	2 h (fast)
Ultraviolette F77	EV bike	7.1 kWh	180 km	5 h

* Typical city range on a full battery. Actual range depends on speed, load, riding mode and traffic.

2. Before you ride

2.1 Check the battery level on the dashboard at pickup. Every EV leaves the hub with at least 80% charge.

2.2 Plan your trip so that you return with enough charge. Riding in Eco mode gives the longest range.

3. Charging

3.1 You may charge at any RideWise hub or an approved public charger. Charging at a RideWise hub is free.

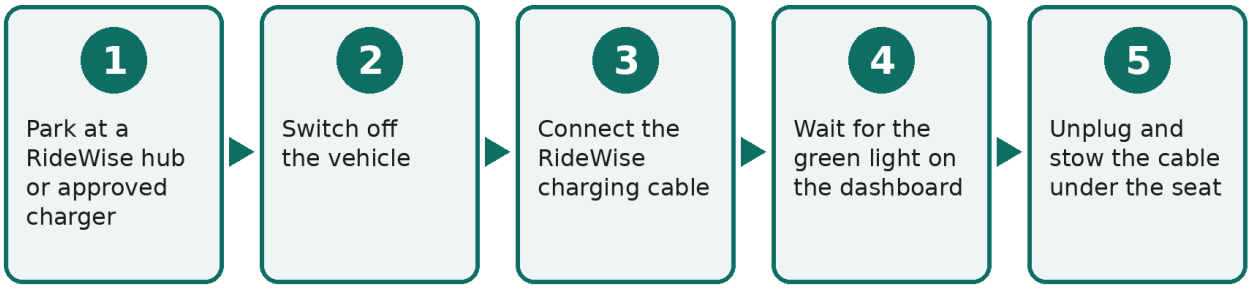

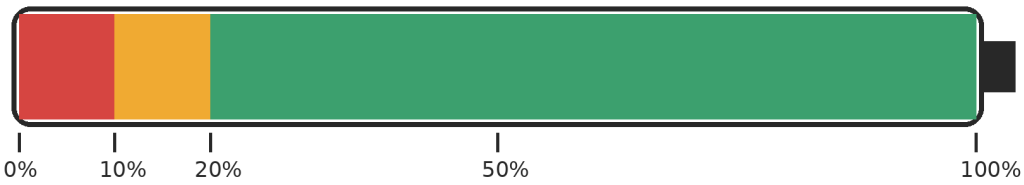

Figure 1: How to charge a RideWise EV.

4. Returning the vehicle

4.1 Return the EV to the same hub you picked it up from, with the battery level shown below in mind.

Battery level at return

RED (below 10%): ₹150 low-battery charging fee applies

AMBER (10% - 19%): no fee, but please charge before your next trip

GREEN (20% and above): ideal return level

Exactly 10% is not below 10%, so no fee is charged.

Figure 2: Battery level at return and the charging fee.

5. Frequently asked questions

Q. What happens if the battery runs out during my trip?
Stop in a safe place and call RideWise Support on +91 80 4000 1234. A team from the nearest hub will bring a charged vehicle or tow the EV. Towing is free if the vehicle had a fault; otherwise a recovery charge may apply.

Q. Can I charge the EV at home?
Yes. Use only the RideWise charging cable supplied under the seat, with a properly earthed 15 A socket.

Q. What if I return the EV with less than 10% battery?
A flat low-battery charging fee applies, as set out in the Late Return & Damage Penalty Schedule.

Q. Does a low-battery return also count as a late return?
No. They are separate. If the EV is both late and below 10%, both fees apply.

Q. Who pays for damage to the charging port or cable?
Damage is assessed by hub staff and handled under the damage section of the Penalty Schedule.

Q. My dashboard shows a battery warning light. What should I do?
Stop riding, switch off the vehicle and call RideWise Support. Do not try to open the battery compartment.
